ANDERSON BANIHIRWE

I contribute to and maintain several libraries within the open source scientific Python stack, particularly around improving scalability of Python tools in order to handle terabyte-scale datasets on HPC and cloud platforms.

🎓 EDUCATION

2018
|
2014

B.S., Computer Systems Engineering
University of Arkansas at Little Rock

📍 Little Rock, AR

💼 PROFESSIONAL EXPERIENCE

present
|
2020-10

Software Engineer ||
National Center for Atmospheric Research

📍 Boulder, CO

· Created jupyter-forward[1], a Jupyter Lab port forwarding utility that simplifies running jupyter on remote resources.
· Served as a core developer of xarray, an open source library for working with multidimensional labeled datasets and arrays in Python.

2020-9
|
2018-10

Software Engineer |
National Center for Atmospheric Research

📍 Boulder, CO

· Led the intake-ESM project, a Python data cataloguing package for exploring and ingesting earth system model data sets.
· Contributed to the core software stack powering the Pangeo Project. Some of the projects I contributed to include: xarray, dask.
· Assisted with the development and deployment of live (virtual or in-person) and online/self-paced education material.

2018-09
|
2018-05

Software Developer Intern
Quansight

📍 Austin, TX

· Developed xndframes[2], a Pandas ExtensionDtype/Array backed by xnd[3], a container type that maps most Python values relevant for scientific computing directly to typed memory.
· Worked on integrating cuDF[4] - GPU dataframe library with Apache Arrow[5] library.

2018-04
|
2017-11

Data Science Intern
First Orion

📍 Little Rock, AR

· Built scoring, predictive models with Scikit-learn, Dask, and Apache Spark using First Orion's proprietary telecommunication data.
2017-08
|
2017-05

Research Intern
National Center for Atmospheric Research

📍 Boulder, CO

· Developed spark-xarray[6], a Python package that integrates PySpark and xarray for climate data analysis.

📖 SELECTED PUBLICATIONS, POSTERS, AND TALKS

2020-11

Cloud-Native Repositories for Big Scientific Data[7]

Computing in Science and Engineering

· Authored with Ryan Abernathey, Tom Augspurger, et al.

2020-10

Pangeo Benchmarking Analysis: Object Storage vs. POSIX File System[8]

Fifth International Parallel Data Systems Workshop @ SC 20

· Authored with Haiying Xu, Kevin Paul.

2020-01

The Pangeo Ecosystem: Interactive Computing Tools for the Geosciences: Benchmarking on HPC[9]

2019 Supercomputing Conference Workshop on Interactive High-Performance Computing

· Authored with Tina Erica Odaka, Guillaume Eynard-Bontemps, Aurelien Ponte, Guillaume Maze, Kevin Paul, Jared Baker, Ryan Abernathey.

2020-09

Zarr: chunked, compressed, multidimensional arrays[10]

2020 Cloud Native Geospatial Outreach Day   📍 Online

· Invited talk about Zarr[11], an open source data format for the storage of chunked, compressed, multidimensional arrays.

2020-07

Intake-ESM – Making It Easier To Consume Climate and Weather Data[12]

2020 ESIP Summer Meeting   📍 Online

· Invited talk about intake-esm, an intake plugin for working with Earth System Model (ESM) datasets.

2019-01

Perceptual Judgments to Detect Computer Generated Forged Faces in Social Media[13]

IAPR Workshop on Multimodal Pattern Recognition of Social Signals in Human-Computer Interaction

· Authored with Suzan Anwar, Mariofanna Milanova, Mardin Anwer.

2019-07

Interactive Supercomputing with Dask and Jupyter[14]

2019 Scientific Computing with Python conference   📍 Austin, TX

· Contributed talk about Dask and Jupyter.

2018-04

Beyond Matplotlib - Tutorial: Building Interactive Climate Data Visualizations with Bokeh and Friends[15]

2018 UCAR Software Engineering Assembly conference   📍 Boulder, CO

· Contributed tutorial about interactive visualization with Python.

2018-01

PySpark for "Big" Atmospheric Data Analysis

Eighth Symposium on Advances in Modeling and Analysis Using Python

📍 Austin, TX

· Contributed talk about spark-xarray[16].
